REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims a control circuit for a fuel cell system having a fuel cell stack and a battery, the control circuit comprising a series pass element electrically coupled between a portion of the fuel cell stack and a portion of the battery and a regulating circuit for linearly regulating current through the series pass element in response to a greater of a battery charging current error, a battery voltage error and a stack current error wherein the regulating circuit comprises a battery charging current error integrator, a battery voltage error integrator, a stack current error integrator, and an OR circuit coupled to the output of each of the error integrators to select a greater one of the error signals from the error integrators.

The prior art of record, taken either alone or in combination, fails to disclose or render obvious a control circuit, which comprises a series pass element electrically coupled between a portion of the fuel cell stack and a portion of the battery and a regulating circuit for linearly regulating current through the series pass element in response to a greater of a battery charging current error, a battery voltage error and a stack current error wherein the regulating circuit comprises a battery charging current error integrator, a battery voltage error integrator, a stack current error integrator, and an OR circuit coupled to the output of each of the error integrators to select a greater one of the error signals from the error integrators.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
